

Notice of Electric Power Rate Adjustment

Mission Valley Power is implementing a pass-thru rate adjustment due to the increasing costs of purchasing electricity. Additionally, there will be a \$2.00 planned increase to the basic rate as agreed upon in 2013. The rate adjustment will be effective October 1, 2019.

Per CFR §175.12 and 175.13, the Northwest Regional Director of the Bureau of Indian Affairs Central Office has approved the pass-through rate adjustment. If you would like to read the complete notice, you may pick up a copy at Mission Valley Power's Main office in Pablo.

In summary, the pass-thru kilowatt hour adjustment will affect the following classes of service: Residential, General Services Without Demand, General Services With Demand, Large Commercial, Irrigation, Metered Area Lights, Unmetered Area Lights and Street Lights. The basic rate adjustment will affect Residential, Prepay and General Services Without Demand.

The current Residential rate is \$0.0683 per kilowatt hour and the basic rate is \$13.00. The adjustment will cause this rate to change to \$0.0689 per kilowatt hour and a basic rate of \$15.00. For example, a household using 1200 kilowatt hours per month will see an increase of \$2.72 per month as a result of this adjustment. Other rate classes will be similarly affected by the adjustment.
