

Mission Valley Power Commercial Pre Rinse Valve Program 2017

Information For Electrically Heated Water Only

Account # _____ Date _____/_____/_____

Name: _____

Address: _____

City State Zip

Type of Facility; _____ Phone # : _____

Commercial Building Meal Shifts Per Week: _____

Water Heater: Electric Propane Fuel Oil Other

Water Heater Type: Tank Type Boiler Type Demand Type Other Type

Number of Pre Rinse Valves replaced: _____

Brand and Model number: _____

Requirements and Specifications

Qualified installations require electrically heated dishwashing water in a facility that (1) serves 10 or more meal shifts per week (e.g., a facility that serves lunches and dinners, five days a week) or (2) has a documented rinse system that uses the equivalent amount of energy as 10 or more meal shifts (e.g., commercial bakeries; central school district cafeterias that prepare thousands of hot meals; or catering facilities that may only be used three times a week but provide meals for hundreds of people at a time). The measure requires direct installation (per the [Measure Distribution Processes](#) section in the Multi-Sector chapter) of a new nozzle with a flow rate of 0.65 gallons per minute or lower.

I certify that the showerhead(s) were purchased and installed at the above address. I will allow a representative of Mission Valley Power and/or Bonneville Power Administration to verify installation of the energy efficient insulation measures.
