Commercial Insulation for Attic, Wall and Floor insulation measures are available for spaces that are electrically-heated, less than 5,000 square feet and used for office or retail activities.

Square Foot of Insulation: _____ X \$ _____ SF = \$ _____
Credit Amount Due

Include receipt with application and return to any Mission Valley Power Office:

Copy of insulation receipt of purchase (retailer or insulation contractor w/ before & after R Values, square foot of insulated area, bag count if necessary, along with before and after pictures)

I certify that this insulation was purchased and installed at the above address. I will allow a representative of Mission Valley Power and/or Bonneville Power Administration to verify installation of the energy efficient insulation measures.

Total Installed Cost (before rebate) including equipment, labor, and purchase date. Please include invoice with this project form.	
Date	

By signing this form, I confirm that the above information is correct to the best of my knowledge.

Commercial Insulation

Requirements and Specifications

This measure applies to retrofits only. This measure is available for the commercial, industrial and agricultural

sectors. Utilities shall report this measure as commercial when reporting to BPA.

Preconditions:

This measure is eligible in commercial buildings with the following characteristics:

- The building is electrically heated; and
- The existing insulation value must be between R-0 and R-5.

Post-condition: Post insulation levels required are noted in the payment tables below:

Payment Per square foot of insulation.

Attic/Roof Insulation*

≤R-5 to R-19 = \$1

≤R-5 to R-30 = \$1.05 \$

≤R-5 to R-49 = \$1.10

Wall Insulation

≤R-5 to R-11 = \$0.60

≤R-5 to R-19 = \$0.75

*Attic insulation is defined by insulation that is installed in the attic crawl space, typically on a horizontal surface. Roof insulation is defined by insulation that is installed in direct contact with the building's roof, typically a flat or slightly pitched surface.
