BPA maintains a QPL separate from NEEA in order to align with BPA measures and the Implementation Manual.

* Prior to May 2016, products qualified under the Energy Factor (EF) nc value and the Northern Climate Specification. Those products remain qualified and eligible until discontinued. Beginning in May 2016, changes to the test procedure necessitated a change to the Uniform Energy Factor (UEF) nc value. Hence, all products qualified after May 2016 are subject to the UEF nc requirements of the Advanced Water Heating Specification.
